EXPERIENCE

Dassault Systèmes — 3DEXPERIENCE Platform Infrastructure & Cloud *Infrastructure & Cybersecurity Apprentice*

Sept 2023 – Present
Meudon, France

- Developed a security hardening program for the On-Premise 3DEXPERIENCE Platform, for an energy customer, using Java (for writing the source code) and Rust (for writing tests), to build a health-checking tool that:
 - Verify secure configuration baselines (service states: TLS – versions and cipher suites – testing, sensitive HTTP headers check, HTTP Referrer filtering, HTTP methods management, and checking the absence of CVE-2020-1938 in TomEE AJP Listener).
 - Scan for known vulnerabilities in dependencies using the customer's database.
 - Validate the presence and correctness of security-critical components.
 - Generate reports with minimal runtime overhead.
- Installations and testing of OnPremise 3DEXPERIENCE Platform (23x, 24x, 25x, 26x), with any necessary Native Apps, on VM (Oracle Linux) for POC, and for partner and customer trainings. Dassault Systèmes Licensing Server installation for demonstrations (e.g, for Airbus, Naval Group) or testing.
- Authored an internal reference document explaining the scope and articulation of ISO 27001/27002/27017/27018, used by the pre-sales team to clarify the company's compliance posture in customer discussions.
- Contributing to the *Customer Data Protection* 3DS initiative for helping a part of the EUROWEST team to better manage sensitive customer data.
- Upgrading internal documentation explaining the Dassault Systèmes license's mechanism (OnPremise, and Cloud).

Trombone *Low-Level C Developer (Intern)*

May 2022 – July 2022
Paris, France

- Developed embedded sensor drivers in C for the OS HyperPanelIOS.
- Assisted in deploying and securing the network infrastructure (Wi-Fi and camera systems) for the Solidays festival (+200k attendees).

EDUCATION

EPITA (Graduate School of Computer Science) *Master's Degree in Cybersecurity Engineering*

2020 – 2026
Paris, France

- **Academic Projects:** Deployed SOC (Arkime, Timesketch, Wireshark, Python) and honeypot environments (Cowrie, NIDS); developed a custom OS kernel; malware/forensics analysis (MITRE ATT&CK, YARA rules, Velociraptor); pentesting; DevSecOps with GitHub Actions; developed a voting system through re-implementing the DSA signature algorithm and the ElGamal encryption algorithm.
- **Research Project:** Designed and implemented CNC-BPC, a symbolic classifier based on Formal Concept Analysis (FCA) and Information Theory (Entropy/Information Gain), optimized for imbalanced datasets.

- **Leadership:** Cofounder and President of the EPITA Rust Club. Organized workshops, promoted the Rust language, and fostered a community of student Rustaceans.

SKILLS

- **Spoken Languages:** native French, English (TOEIC 875/990), and basic notions of Spanish.
- **Programming Languages:** Rust, Python, low-level (asm, C), OOP (Java, C#, C++), DB (SQL, CQL), scripting (shell, JS), functional (Scala, Caml), web (HTML/CSS, PHP).
- **Tools:** Docker/Podman, Grafana, VMware Workstation, QEMU, Nixpkgs, Git/SVN/Pijul, KeePassXC, Vim.
- **OS:** Linux (NixOS, Oracle), Windows.
- **AI:** MCP Server (RMCP Rust SDK, MCP Inspector), Ollama, Claude-Code (with Chrome extension), Mistral-Vibe, Cursor.
- **Database & Storage:** PostgreSQL, ScyllaDB, Oracle, AWS S3, GCP.
- **Log handling and analysis:** Tracing (from Tokio.rs).
- **Others:** Car license (manual and automatic).

OTHER EXPERIENCE

- **Fundraiser,** ODEEF (Apr 2019 – May 2019)
- **Team Member,** McDonald's (Jul 2018 – Aug 2018)
- **Heritage Restoration Volunteer,** REMPART (Jul 2017)

INTERESTS

- **Music:** Accoustic guitar
- **Sport:** Running
- **Other:** ZeroClaw, YubiKey, OWASP, Rust ecosystem, Open Source ecosystem, formal verification.
