PROFILE

Engineering student (MSc) bridging technology and business, with hands-on experience supporting enterprise clients in energy, aerospace, and defense. Eager to apply analytical rigor, client engagement, and proven leadership to management consulting.

EXPERIENCE

Dassault Systèmes — 3DEXPERIENCE Platform Infrastructure & Cloud *Infrastructure & Cybersecurity Apprentice*

Sept 2023 – Present
Meudon, France

- Supported a major **energy-sector client** in securing their on-premise 3DEXPERIENCE deployment: delivered an automated security health-check tool that replaced slow manual audits and flagged misconfigurations and vulnerabilities in a single report.
- Synthesized the scope, roles, and articulation of the **ISO 27001 / 27002 / 27017 / 27018** standards into a clear internal reference, adopted by the **pre-sales team** to articulate the company's compliance posture with clients.
- Delivered platform installations, demos, and trainings for partners and customers, including **Airbus** and **Naval Group**.

H&F - AI Matchmaking Startup *Founder & Lead Developer*

Early 2025 – Early 2026
Paris, France

- Founded and solo-built the core product: an **MCP server** enabling any AI assistant to match people, starting with the dating vertical.
- Recruited and directed a second developer for testing and infrastructure; reached a near-complete proof of concept before pausing to focus on studies.

Trombone *Infrastructure Deployment Intern*

May 2022 – July 2022
Paris, France

- Coordinated on-site deployment of network and camera infrastructure for the **Solidays festival** (200k attendees) under tight timelines; developed embedded sensor drivers in C.

EDUCATION

EPITA (Graduate School of Computer Science) *Master's Degree in Cybersecurity Engineering*

2020 – 2026
Paris, France

- Leadership:** Co-founded and led, as **President**, the EPITA Rust Club — grew a student community from scratch, organized workshops, and coordinated a team of contributors.
- Analytical research:** Designed CNC-BPC, a **symbolic classifier** (Formal Concept Analysis, Information Theory) optimized for imbalanced datasets.
- Applied projects:** Team deliverables across security operations and system design.

SKILLS

- Languages:** French (native), English (professional, TOEIC 875/990).
- Business & methods:** synthesizing complex topics into clear documentation (e.g. an ISO 27001-family reference for pre-sales), data protection awareness, pre-sales support.
- Analytical & technical:** data analysis, programming (Rust, Python, Java, C++), SQL databases, cloud (GCP, AWS), AI tooling (Hermes-Agent).
- Tools:** n8n, Docker, Git, Grafana, virtualization (VMware, QEMU), Linux.

OTHER EXPERIENCE & INTERESTS

- **Other experience:** Fundraiser, ODEEF (2019) · Team Member, McDonald's (2018) · Heritage Restoration Volunteer, REMPART (2017).
- **Interests:** AI · guitar · running · open-source ecosystem.
